

INDUSTRY LEADER INTRODUCES NEW PREMIUM IGNITION FOR GAS FIRE FEATURES

For Immediate Release

Outstanding Reliability - Superior Performance -Exceptional Value

Englewood, CO – July 11, 2023

Warming Trends is proud to introduce the state-of-the-art Platinum Ignition. Through expert engineering, the 24-volt automatic ignition is designed and built to eliminate industry-wide weaknesses in outdoor gas fire feature ignitions. The Platinum has 680,000 BTUs of gas output and has a MSRP \$1,939.00. This innovative system delivers superior performance and reliability at an extremely competitive price.

Key features of the Platinum Automatic Ignition include:

- Unique wind cage design that provides appropriate air flow and true protection to the pilot components from wind and rain.
- Customized ignition settings that allow for better performance and reduced cycling faults
- Robust components that provide outstanding reliability and durability
- LED-based diagnostics the allow for quick and easy troubleshooting
- Designed for field serviceability
- Coupled with the patent-pending Warming Trends' WATERSTOP™ fitting provides unmatched protection for the ignition from water and debris

Colorado-based Warming Trends is the industry leader in the design and manufacture of superior gas fire features. The Platinum is proudly made in the USA, CSA certified and offered exclusively by Warming Trends. Superior performance, outstanding price - Warming Trends' definition of innovation.
